PROJECTS RECENTLY WORKED ON (More on [Portfolio](#))

E-Commerce Website

 MERN Application

This was built as an effort to learn MERN Stack Web Application Development.

The Users could Login or Register and can buy dried fishes online. It also had additional features like email billing and much more.

Newzio (News Tracker Application)

 Python -Flask

Worked on this project as a result to learn the workflow of Python. It's a News Tracker Web-Application which displays news of all regions. And users can register and login to the system and the categories which is chosen by the user will only be displayed on his login.

Face Recognition based Attendance System

 Python

This Project was done as a Mini project for my college. The Concept was, using face, the System recorded the Attendance in a daily basis and sends the Attendance Report through Email.
